Logitech Logitech Internet

Part number: 967005-0403

The Logitech Internet keyboard puts Web browser control at your fingertips. With seventeen dedicated buttons providing one-touch access to the Explorer or Navigator commands you use most often, you don't even have to take your hands off the keyboard to navigate the Web. Programmable buttons that are easy to customize take you instantly to your favorite sites and applications.

Regular keyboard functions are convenient too, since the elegant design provides quiet, full-size keys in a familiar 104-key layout. Rest your hands on the gently curved palm rest during typing breaks or detach it when you want more desk space. Besides some keyboards have digital radio technology that provides reliability, which infrared cordless devices just can't match. Infrared technology, such as your TV remote, requires aiming and a clear path to work. With radio technology, your device communicates flawlessly with the computer without needing to be in a direct line of sight.

Extended specifications

General	
Width	18.6 in
Depth	7.8 in
Height	1.9 in
Weight	2.6 lbs
Enclosure Color	White
Device Type	Keyboard
